SUMMARY

Passionate **Full-stack Developer** specialized in **MERN stack**, **TypeScript**, and **PHP (CodeIgniter)**, with extensive experience developing **scalable web applications** and **RESTful APIs**. Proven record in enhancing **application performance** and delivering **high-quality software solutions**.

EDUCATION

B.E. in Information Technology

2018-2022

Padre Conceicao College of Engineering

SKILLS

Technical Skills

React, Node.js, Express, TypeScript, Next.js, SQL, PHP, CodeIgniter

Tools

Git, MySQL, VS Code, Google Cloud, Linux, Docker, PostgreSQL, MongoDB.

EXPERIENCE

Jr. Software Developer

Mar 2023 - Apr 2024

Umang

Panaji, Goa

- Developed and maintained healthcare-focused web applications using **CodeIgniter**, **PHP**, **HTML**, **CSS**, **JavaScript**, and **Bootstrap**, prioritizing **data privacy** and **accuracy**.
- Optimized application performance by designing complex **SQL queries** and building **RESTful APIs**, utilizing **Postman** for testing.
- Automated tasks using **cron job scripts** and enhanced user experience with **PDF/Excel generation**, **email integration** (including **OAuth 2**), and responsive **UI design**.

Full Stack Developer

May 2024 – Present

Bluestream.io

Panaji, Goa

- Built and maintained scalable web applications using **React**, **Node.js**, **MongoDB**, and **PostgreSQL**, focusing on **e-commerce platforms** (with admin panels) and **pet care systems** (appointment booking and admin management). Utilized global state management with **Redux Toolkit/Zustand** and **React Query** for efficient data handling.
- Designed visually appealing and responsive dashboards for **restaurant analytics** using **Recharts**, **React**, and **Tailwind CSS**, delivering user-friendly experiences with interactive charts.
- Gained hands-on experience with **Docker**, **Linux**, and **VPS management**, while supporting and maintaining legacy **PHP applications** alongside modern systems.

PROJECTS

Pizza Store

[Github](#) | [Demo Video](#)

- Developed a full-featured **food ordering platform** with an integrated admin panel for managing products, orders, and coupons, streamlining end-to-end user flows including product browsing, order placement, and a robust checkout process.
- Implemented dynamic **product customization**, allowing users to easily select and modify add-on options to tailor their orders.
- Integrated **Razorpay** for secure online payments, supporting both **cash-on-delivery** and online payment methods with real-time validation.
- Engineered efficient data fetching and state management using **TanStack Query** and **Drizzle ORM** with **PostgreSQL**, and crafted a modern, responsive UI with **Tailwind CSS** and **Mantine**.
