SUMMARY

Passionate Full-stack Developer with **2+ years of experience** specializing in **MERN stack**, **TypeScript**, and **PHP (CodeIgniter)**. Successfully developed **scalable web applications**, optimized **performance** significantly, and delivered impactful solutions in **healthcare** and **e-commerce** sectors.

EDUCATION

B.E. in Information Technology
Padre Conceicao College of Engineering

2018-2022
70%

SKILLS

Technical Skills	HTML, CSS, JavaScript, React, Node.js, Express, TypeScript, Next.js, SQL, PHP
Tools	Git, MySQL, PostgreSQL, MongoDB, Docker, Linux, VS Code, Google Cloud, AWS

EXPERIENCE

Jr. Software Developer
Umang

Mar 2023 - Apr 2024
Panaji, Goa

- Spearheaded the development of a responsive patient record management system for nurses using **CodeIgniter** and **PHP**, ensuring data privacy and timely delivery in direct collaboration with a Dutch-based client.
- Enhanced and maintained a portfolio of web applications (e.g., e-commerce, dental software) by implementing features and resolving critical bugs using core **PHP**, **HTML**, **CSS**, **JavaScript**, and complex **SQL queries**.
- Engineered **RESTful APIs**, optimized application performance through **SQL query design**, and automated backend processes (e.g., data synchronization, cleanup) using **cron job scripts** on Linux servers.
- Improved data accessibility and workflow efficiency by integrating **PDF/Excel report generation** and secure **OAuth 2.0 email functionalities** into healthcare applications.

Full Stack Developer
Bluestream.io

May 2024 – Present
Panaji, Goa

- Led the frontend architecture and development of a new **e-commerce platform** and admin panel from scratch, utilizing **React**, **Zustand**, and **React Query**, and contributed to backend **Node.js** API integration.
- Engineered role-specific portals (admin, veterinarian, groomer) for a comprehensive **pet care management system** using **React** and **Redux Toolkit**, featuring data dashboards and operational tools, including backend support (**Node.js**, **PostgreSQL**).
- Developed the complete frontend for a **restaurant analytics dashboard** from Figma designs using **React**, **Recharts**, and **Tailwind CSS**, implementing interactive data visualizations and responsive **PDF report generation**.
- Managed **Linux** VPS environments, **Docker** containerization, and **Jenkins CI/CD** pipelines, while also providing maintenance for a legacy **PHP** application and delivering client **WordPress** sites.

PROJECTS

Pizza Store

[Github](#) | [Demo Video](#)

- Built a full-featured food ordering platform & admin panel (products, orders, coupons); streamlined user flows (browse, order, checkout).
- Implemented dynamic product customization with selectable add-ons for tailored orders.
- Integrated **Razorpay** for secure payments (online & COD) with real-time validation.
- Efficient data/state mgmt (**TanStack Query**, **Drizzle ORM**, **PostgreSQL**); responsive UI (**Tailwind CSS**, **Mantine**).
